- **GEM** - Gen1/2/3

Example Vehicle Specific Adapter

Compatible with:

GEM

The **ChargePlus** is a lightweight and portable charger designed to optimize battery capacity and overall battery longevity. It is a terrific option for either the shop floor or for grab and go off-site maintenance charging opportunities.

Front Display

LED indicators with status screen for quick charge cycle monitor and status. The main display illuminates three-digits plus symbol:

A = the charging current
U = battery voltage
H = charging time
C = charging ampere-hours (Ah)
E = kilowatt energy used (kWh)
The charging current is the default value shown.

*Pictured is the **ChargePlus**; only difference for the **ChargePlus72V** is that the label
