

USB Mobile Device Charger Kit

For 36-80 Volt Electric Vehicles Including Club Car, E-Z-GO & Yamaha

This easy to install kit charges phones, tablets, range finders, GPS devices & more. The voltage reducer protects the vehicle's batteries from unequal drain.

Features:

- Voltage reducer limits strain on batteries
- In-line fuse for surge protection
- 2.1 amp output charges most devices
- Easy installation for clean, professional look
- Weather resistant port protects from elements
- Backed by a one year warranty

Kit includes: Waterproof charging port (1), Voltage Reducer/DC to DC converter with double sided tape for easy mounting (2), battery connection with surge protector (3), installation instructions & hardware.
