# Zapi FC2009A 16 Truck Conversion Handset

(FSIP P/N: 66-FC2009A-16)

## Brand Selection

To use the handset, turn the knob on the handset to the number that corresponds to the truck brand you will be working on. Be sure to select the correct truck brand BEFORE connecting to the controller. To change brands, disconnect the handset from the controller.

## Applicable Brands

This handset contains the software for most Zapi controllers. However, it does not fully support all truck configurations. Because some truck brands use similar communication protocol, not all truck brands are listed on the handset label. Please use the chart below as reference:

| Handset Brand Label | Usage |
|---|---|
| BT | Used for BT trucks with Zapi controllers |
| Cesab | Used for BT and Cesab trucks with Zapi controllers |
| Clark AC | Used for newer Clark trucks with AC controllers |
| Clark DC | Used for older Zapi controllers in Clark trucks |
| Crown | Used for Zapi controllers in Crown trucks |
| Jungheinrich | Used for Jungheinrich trucks with Zapi controllers |
