

# DELTA-Q BATTERY CHARGERS

Delta-Q battery chargers are durable and efficient, built for reliability and charging performance. Optimized charge profiles for battery brands and types ensures improved battery life and performance. All Delta-Q chargers are IP66 sealed and tested to automotive standards for long service lives.

## QuiQ Series

- 24V, 36V, 48V, 72V & 96V
- High-performance, optimized charge profiles for lead-acid & lithium batteries
- Fully sealed design for protection against chemicals, dust, temperature, vibration & water
- All QuiQ chargers share identical mechanical designs for easy replacement options
- FSIP offers AC cabling, customer supplies DC cabling
- Ring terminals connections with temp sensor & interlock
- Multi-color LED indicator for charging status & fault/error codes

## IC650 Series

- 24V, 36V & 48V
- High-performance, optimized charge profiles for lead-acid & lithium batteries
- Compact, sealed, die cast aluminum enclosure for durability
- FSIP offers AC cabling, customer supplies DC cabling
- USB host port for data download & software upgrades
- Change charge profiles at the touch of a button
- Storage for up to 25 charge profiles

## Accessories

- Quiq AC Cord
- IC650 Locking AC Cord
