

## Electrification • Motor and Controller Distribution Software Creation and Support • Instrumentation

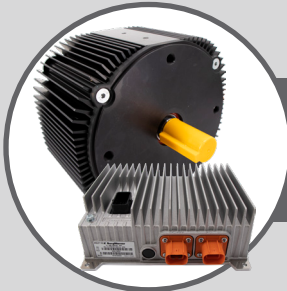

The electric system design team at FSIP specializes in providing products and support to vehicle and equipment manufacturers during the development or upgrading process. Using its technical expertise, FSIP can assist from conception to prototyping and production. The team will work directly with the manufacturer to deliver customized motor and controller solutions that meet the system requirements.

**AC Induction Motors  
& Controllers**

**Graphic Displays**

**PMAC Motors &  
Controllers**

**Battery Chargers:  
On-board & Standalone**

**DC Separately Excited  
Motors & Controllers**

**Wire Harness Design  
& Manufacturing**

**High Current Solenoids  
& Contactors**

**Custom Controller  
Software**
