

FSIP offers a variety of battery watering products. Many of these products can be used alone or paired with each other to make watering your lead-acid batteries quick, easy, and effective.

Deionizer System & Watering Gun

A professional quality deionizer purifies water right from your own tap and is a simple and effective way to maximize battery life. This deionizer works by passing tap water through the cartridge containing beds of cationic and anionic resins which electrostatically removes impurities. A low-cost source of pure battery water.

Comes with everything you need to make pure water from the tap, including:

- Wall-mounting plate, and hose hanger
- One (1) high-capacity deionizer cartridge (rated for 600 gallons of pure water*)
 - Purity light indicates when it's time to change the cartridge
 - Quick change requires no tools
- Quick connects input/output hoses (20 feet)
- Ergonomic watering gun equipped with quick disconnect
 - Secure level control nozzle
 - Easy squeeze handle that is fast filling for quicker watering

**Capacity varies with purity of incoming water*

Replacement Parts:

Replacement Watering Gun

Replacement Cartridge

Battery Water Monitor

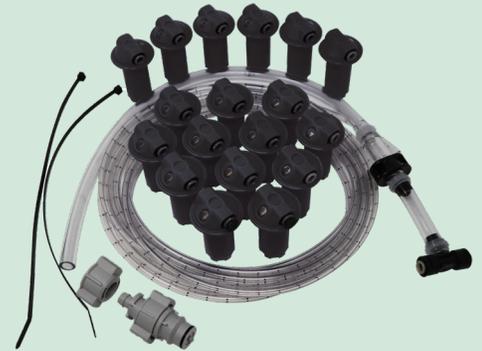

- Bright LED blinks green when electrolyte levels are acceptable
- Electrolyte probe and LED are integrated in the same housing for easy installation

Pair with Water Deionizer System and Stealth Watering System for an effective battery maintenance program.

Stealth Single Point Watering System

- Available in 24 V, 36 V and 48 V
- Fills all battery cells to the same level at once
- Push-fit ports make installation fast, easy, and secure

Stealth Single Point Watering System Adapter

- Easy to install
- Integrated flow restrictor shows when filling has stopped
- Includes connector for use with water deionizer system

Stealth Watering System Direct Link

For use with the Stealth Watering System and your existing plumbing.

- Inline sediment filter
- Industrial hose (20 feet)
- Pressure regulator
- Flow indicator (spinner)
- Stealth Watering System connection (female)

Stealth Watering System 10 Gallon Portable Watering Cart

Designed to work with the Stealth Watering System.

- 9-foot hose
- Sealed 12-volt battery and battery charger
- Easy fill, large opening
- On/Off switch
- May be used with the Watering Gun, additional adapters may be required

Stealth Watering System Gravity Tank

Designed to work with the Stealth Watering System.

- Holds 5 gallons
- Uses gravity for water pressure
- Easy fill, flow indicator
- Must be mounted 5 feet above battery
- 25-foot output hose (requires female CPC® connector)
